

THOMPSON T-100 D

Continuous Feeding System

**built
for the
short &
long run**

Easy-to-use, the Thompson T-100 D is designed to maximize envelope and postcard print production. Its predecessor model, the T-100, has assisted thousands of offset printers for over 25 years and it has been re-designed to run on many of the digital printing systems now on the market. It's rugged construction and reliability make this feeder a valuable piece of equipment that will pay for itself many times over. It runs continuously without stopping to reload and is easy to set-up and use.
